Re: Unimatic Manufacturing Co.
25 Sherwood Lane, Fairfield, New Jersey
ISRA Case # E20010335
PI #99235

Dear Mr. Mumford:

I have been the designated Licensed Site Remediation Professional (LSRP) for the above-referenced spill case since 2011, and it is my understanding that you are the designated contact person at NJDEP for this case. In February 2011, GZA GeoEnvironmental, Inc. (GZA) submitted a Remedial Action Work Plan (RAWP) to the NJDEP. The NJDEP sent a series of comments on the RAWP to GZA in late 2011. As you are aware, limited funds are available to remediate the soils and groundwater at this Site. GZA informed NJDEP that incorporating all of these comments into a revised RAWP would result in a scope of work that could not be implemented given the project's budget constraints.

Since receiving the comments, GZA has tried to work with the NJDEP and the United States Environmental Protection Agency (USEPA) to find a way to accommodate the various complicated and overlapping federal and State regulatory requirements for this case within the given fiscal constraints. For well over a year, I have tried in vain to set up a meeting with the project stakeholders, including the NJDEP, the USEPA, and Frameware, the property operator, to develop a remedial response that protects human health and the environment within the above-mentioned budgetary constraints.

On January 16, 2013, you indicated in an email that NJDEP was waiting for the USEPA report on its testing results before such a meeting could take place. The USEPA issued its report several weeks ago, and it is my understanding that meetings are occurring regarding this case without my participation. I cannot function as the case LSRP without being aware of decisions being made that would affect the outcome of the case.

Since I'm unable to perform the duties required of me as the case LSRP, I'm left with no choice but to dismiss myself as case LSRP unless the current situation changes by **April 10, 2013**. Please call me at (973) 774-3309 so we can discuss the contents of this letter. Thank you.
